

RING SIZE GUIDE

This guide is designed to help you get the most accurate results so you can choose a ring with the perfect fit. Before measuring your ring size, it is imperative to ensure that this guide is printed in A4 size and scaled to 100%. In order to be certain that your print is as accurate as possible, place a credit card on the line below.

MEASURE BY MATCHING YOUR RING

Begin by placing your ring on one of the circles, which you believe to be the right size. If only the white is visible, it is indeed the ideal size. There shouldn't be any blue showing. If, however, your size is somewhere between two ring sizes, it is advisable to go with the larger size.
